Forward-Looking and Cautionary Statements

- This presentation and related discussion contain projections of future results and other forward-looking statements. Achievement of future results is subject to risks, uncertainties and inaccurate assumptions. In the event that risks or uncertainties materialize, or underlying assumptions prove inaccurate, actual results could vary materially from those contained in such forward-looking statements. Pursuant to the “safe harbor” provisions of the Private Securities Litigation Reform Act of 1995, PMI is identifying important factors that, individually or in the aggregate, could cause actual results and outcomes to differ materially from those contained in any forward-looking statements made by PMI
- PMI's business risks include: excise tax increases and discriminatory tax structures; increasing marketing and regulatory restrictions that could reduce our competitiveness, eliminate our ability to communicate with adult consumers, or ban certain of our products; health concerns relating to the use of tobacco and other nicotine-containing products and exposure to environmental tobacco smoke; litigation related to tobacco use and intellectual property; intense competition; the effects of global and individual country economic, regulatory and political developments, natural disasters and conflicts; changes in adult smoker behavior; lost revenues as a result of counterfeiting, contraband and cross-border purchases; governmental investigations; unfavorable currency exchange rates and currency devaluations, and limitations on the ability to repatriate funds; adverse changes in applicable corporate tax laws; adverse changes in the cost, availability, and quality of tobacco and other agricultural products and raw materials, as well as components and materials for our electronic devices; and the integrity of our information systems and effectiveness of our data privacy policies. PMI's future profitability may also be adversely affected should we be unsuccessful in our attempts to produce and commercialize reduced-risk products or if regulation or taxation do not differentiate between such products and cigarettes; if we are unable to successfully introduce new products (“RRPs”), promote brand equity, enter new markets or improve our margins through increased prices and productivity gains; if we are unable to expand our brand portfolio internally or through acquisitions and the development of strategic business relationships; or if we are unable to attract and retain the best global talent. Future results are also subject to the lower predictability of our reduced-risk product category's performance
- PMI is further subject to other risks detailed from time to time in our publicly filed documents, including the Form 10-Q for the quarter ended March 31, 2021. PMI cautions that the foregoing list of important factors is not a complete discussion of all potential risks and uncertainties. PMI does not undertake to update any forward-looking statement that we may make from time to time, except in the normal course of its public disclosure obligations

Forward-Looking and Cautionary Statements (COVID-19)

- The COVID-19 pandemic has created significant societal and economic disruption, and resulted in closures of stores, factories and offices, and restrictions on manufacturing, distribution and travel, all of which will adversely impact our business, results of operations, cash flows and financial position during the continuation of the pandemic. Our business continuity plans and other safeguards may not be effective to mitigate the impact of the pandemic
- Currently, significant risks include our diminished ability to convert adult smokers to our RRP, significant volume declines in our duty-free business and certain other key markets, disruptions or delays in our manufacturing and supply chain, increased currency volatility, and delays in certain cost saving, transformation and restructuring initiatives. Our business could also be adversely impacted if key personnel or a significant number of employees or business partners become unavailable due to the COVID-19 outbreak. The significant adverse impact of COVID-19 on the economic or political conditions in markets in which we operate could result in changes to the preferences of our adult consumers and lower demand for our products, particularly for our mid-price or premium-price brands. Continuation of the pandemic could disrupt our access to the credit markets or increase our borrowing costs. Governments may temporarily be unable to focus on the development of science-based regulatory frameworks for the development and commercialization of RRP or on the enforcement or implementation of regulations that are significant to our business. In addition, messaging about the potential negative impacts of the use of our products on COVID-19 risks may lead to increasingly restrictive regulatory measures on the sale and use of our products, negatively impact demand for our products, the willingness of adult consumers to switch to our RRP and our efforts to advocate for the development of science-based regulatory frameworks for the development and commercialization of RRP
- The impact of these risks also depends on factors beyond our knowledge or control, including the duration and severity of the pandemic, its recurrence in our key markets, actions taken to contain its spread and to mitigate its public health effects, and the ultimate economic consequences thereof

3

On Track for Strong 2021 Performance

- Reaffirming 2021 adjusted diluted EPS forecast of \$5.95-\$6.05, 11-13% organic growth:
 - Continue to expect adjusted diluted EPS of \$1.50-\$1.55 for Q2, 2021
- On track to deliver 95-100 billion units of 2021 HTU shipments
- Robust Q2 dynamics:
 - Accelerating heat-not-burn category, continued strong IQOS growth
 - Strong sequential and year-over-year PMI HTU shipment and IMS growth driven by EU, Japan & Russia
 - Expect PMI Q2 HTU shipment volume of around 24 billion units
 - Strong total market, sequential growth in cigarette market share
- Product Innovation: On track for *ILUMA* launch in H2, 2021
- Engaging with Investors on Sustainability and PMI's transformation

Glossary of Key Terms and Definitions and Reconciliation of Non-GAAP Measures

Glossary: General Terms

- "PMI" refers to Philip Morris International Inc. and its subsidiaries
- Until March 28, 2008, PMI was a wholly owned subsidiary of Altria Group, Inc. ("Altria"). Since that time the company has been independent and is listed on the New York Stock Exchange (ticker symbol "PM")
- Trademarks are italicized
- Comparisons are made to the same prior-year period unless otherwise stated
- Unless otherwise stated, references to total industry, total market, PMI shipment volume and PMI market share performance reflect cigarettes and heated tobacco units
- References to total international market, defined as worldwide cigarette and heated tobacco unit volume excluding the U.S., total industry, total market and market shares are PMI estimates for tax-paid products based on the latest available data from a number of internal and external sources and may, in defined instances, exclude the People's Republic of China and/or PMI's duty free business. In addition, to reflect the deconsolidation of PMI's Canadian subsidiary, Rothmans, Benson & Hedges, Inc. (RBH), effective March 22, 2019, PMI's total market share has been restated for previous periods
- 2020 and 2021 estimates for total industry volume and market share in certain geographies reflect limitations on the availability and accuracy of industry data during pandemic-related restrictions
- "OTP" is defined as "other tobacco products," primarily roll-your-own and make-your-own cigarettes, pipe tobacco, cigars and cigarillos, and does not include reduced-risk products
- "Combustible products" is the term PMI uses to refer to cigarettes and OTP, combined
- In-market sales, or "IMS," is defined as sales to the retail channel, depending on the market and distribution model
- "Total shipment volume" is defined as the combined total of cigarette shipment volume and heated tobacco unit shipment volume
- "RBH" refers to PMI's Canadian subsidiary, Rothmans, Benson & Hedges Inc.
- The Companies' Creditors Arrangement Act (CCAA) is a Canadian federal law that permits a Canadian business to restructure its affairs while carrying on its business in the ordinary course

7

Glossary: General Terms (cont.)

- "EU" is defined as the European Union Region
- "EE" is defined as the Eastern Europe Region
- "ME&A" is defined as the Middle East & Africa Region and includes PMI's duty free business
- "S&SA" is defined as the South & Southeast Asia Region
- "EA&A" is defined as the East Asia & Australia Region
- "LA&C" is defined as the Latin America & Canada Region
- Following the deconsolidation of PMI's Canadian subsidiary, Rothmans, Benson & Hedges, Inc. (RBH), PMI will continue to report the volume of brands sold by RBH for which other PMI subsidiaries are the trademark owner. These include *HEETS*, *Next*, *Philip Morris* and *Rooftop*
- From time to time, PMI's shipment volumes are subject to the impact of distributor inventory movements, and estimated total industry/market volumes are subject to the impact of inventory movements in various trade channels that include estimated trade inventory movements of PMI's competitors arising from market-specific factors that significantly distort reported volume disclosures. Such factors may include changes to the manufacturing supply chain, shipment methods, consumer demand, timing of excise tax increases or other influences that may affect the timing of sales to customers. In such instances, in addition to reviewing PMI shipment volumes and certain estimated total industry/market volumes on a reported basis, management reviews these measures on an adjusted basis that excludes the impact of distributor and/or estimated trade inventory movements. Management also believes that disclosing PMI shipment volumes and estimated total industry/market volumes in such circumstances on a basis that excludes the impact of distributor and/or estimated trade inventory movements, such as on an IMS basis, improves the comparability of performance and trends for these measures over different reporting periods
- "ESG" stands for environmental, social, and governance
- "OECD" is defined as Organisation for Economic Co-operation and Development
- "SoM" stands for share of market

8

Glossary: Financial Terms

- Net revenues related to combustible products refer to the operating revenues generated from the sale of these products, including shipping and handling charges billed to customers, net of sales and promotion incentives, and excise taxes. PMI recognizes revenue when control is transferred to the customer, typically either upon shipment or delivery of goods
- Net revenues related to RRP's represent the sale of heated tobacco units, heat-not-burn devices and related accessories, and other nicotine-containing products, primarily e-vapor products, including shipping and handling charges billed to customers, net of sales and promotion incentives, and excise taxes. PMI recognizes revenue when control is transferred to the customer, typically either upon shipment or delivery of goods
- "SG&A" stands for selling, general & administrative
- "Adjusted Operating Income (OI) Margin" is calculated as adjusted OI, divided by net revenues
- "Net debt" is defined as total debt, less cash and cash equivalents
- Growth rates presented on an organic basis for consolidated financial results reflect currency-neutral underlying results and "like-for-like" comparisons, where applicable
- Management reviews net revenues, OI, OI margins, operating cash flow and earnings per share, or "EPS," on an adjusted basis, which may exclude the impact of currency and other items such as acquisitions, asset impairment and exit costs, tax items and other special items. Organic growth rates reflect the way management views underlying performance for these measures. PMI believes that such measures, including pro forma measures, will provide useful insight into underlying business trends and results, and will provide a more meaningful performance comparison for the period during which RBH remains under CCAA protection. For PMI's 2018 pro forma adjusted diluted EPS by quarter and year-to-date, see Schedule 3 in PMI's third-quarter 2019 earnings release
- "Fair value adjustment for equity security investments" reflects the adjustment resulting from share price movements in passive investments for publicly traded entities that are not controlled or influenced by PMI. Under U.S. GAAP, such adjustments are required, since January 1, 2018, to be reflected directly in the income statement

Glossary: Reduced-Risk Products

- "Reduced-risk products," or "RRPs," is the term PMI uses to refer to products that present, are likely to present, or have the potential to present less risk of harm to smokers who switch to these products versus continuing smoking. PMI has a range of RRP's in various stages of development, scientific assessment and commercialization. PMI RRP's are smoke-free products that produce an aerosol that contains far lower quantities of harmful and potentially harmful constituents than found in cigarette smoke
- "Aerosol" refers to a gaseous suspension of fine solid particles and/or liquid droplets
- "Combustion" is the process of burning a substance in oxygen, producing heat and often light
- "Smoke" is a visible suspension of solid particles, liquid droplets and gases in air, emitted when a material burns
- "Heated tobacco units," or "HTUs," is the term PMI uses to refer to heated tobacco consumables, which for PMI include the company's *HEETS*, *HEETS Creations*, *HEETS Dimensions*, *HEETS Marlboro* and *HEETS FROM MARLBORO* (defined collectively as *HEETS*), *Marlboro Dimensions*, *Marlboro HeatSticks* and *Parliament HeatSticks*, as well as the KT&G-licensed brand, *Fiit* and *Miix* (outside of Korea)
- The *IQOS* heat-not-burn device is a precisely controlled heating device into which a specially designed and proprietary tobacco unit is inserted and heated to generate an aerosol
- "PMI heat-not-burn products" include licensed KT&G heat-not-burn products
- "PMI HTUs" include licensed KT&G HTUs
- HTU "offtake volume" represents the estimated retail offtake of HTUs based on a selection of sales channels that vary by market, but notably include retail points of sale and e-commerce platforms
- HTU "offtake share" represents the estimated retail offtake volume of HTUs divided by the sum of estimated total offtake volume for cigarettes and HTUs
- Market share for HTUs is defined as the total sales volume for HTUs as a percentage of the total estimated sales volume for cigarettes and HTUs
- "Total *IQOS* users" is defined as the estimated number of Legal Age (minimum 18 years) users of PMI heat-not-burn products for which PMI HTUs represented at least 5% of their daily tobacco consumption over the past seven days. Note: as of December 2020, PMI heat-not-burn products and HTUs include licensed KT&G heat-not-burn products and HTUs, respectively

Glossary: Reduced-Risk Products (cont.)

- The estimated number of adults who have "switched to IQOS and stopped smoking" reflects:
 - for markets where there are no heat-not-burn products other than PMI heat-not-burn products: daily individual consumption of PMI HTUs represents the totality of their daily tobacco consumption in the past seven days
 - for markets where PMI heat-not-burn products are among other heat-not-burn products: daily individual consumption of HTUs represents the totality of their daily tobacco consumption in the past seven days, of which at least 70% is PMI HTUs

Note: as of December 2020, PMI heat-not-burn products and HTUs include licensed KT&G heat-not-burn products and HTUs, respectively

- "FDA" stands for the U.S. Food & Drug Administration
- "MRTP" stands for Modified Risk Tobacco Product, the term used by the U.S. FDA to refer to RRP
- "MRTP application" stands for Modified Risk Tobacco Product application under section 911 of the FD&C Act
- "PMTA" stands for Premarket Tobacco Application under section 910 of the FD&C Act
- "Acquisition" refers to our efforts to switch LAS from smoking cigarettes to RRP or to switch LAU from competing smoke-free products to PMI's RRP
- "Retention" refers to our efforts to deter LAU from going back to smoking cigarettes or from choosing a competing smoke-free product instead of a PMI RRP

Glossary: IQOS in the United States

- On April 30, 2019, the U.S. Food and Drug Administration (FDA) announced that the marketing of a version of PMI's Platform 1 product, namely, IQOS 2.4, together with its heated tobacco units (the term PMI uses to refer to heated tobacco consumables), is appropriate for the protection of public health and authorized it for sale in the U.S. The FDA's decision followed its comprehensive assessment of PMI's premarket tobacco product applications (PMTAs) submitted to the Agency in 2017
- In the third quarter of 2019, PMI brought IQOS 2.4 and three variants of its heated tobacco units to the U.S. through its license with Altria Group, Inc., whose subsidiary, Philip Morris USA Inc., is responsible for marketing the product and complying with the provisions set forth in the FDA's marketing orders
- On July 7, 2020, the FDA authorized the marketing of a version of PMI's Platform 1 product, namely, IQOS 2.4, together with its heated tobacco units, as a Modified Risk Tobacco Product (MRTP). In doing so, the agency found that an IQOS exposure modification order is appropriate to promote the public health. The decision followed a review of the extensive scientific evidence package PMI submitted to the FDA in December 2016 to support its MRTP applications
- On December 7, 2020, the FDA confirmed that the marketing of a version of PMI's Platform 1 product, namely, IQOS 3, is appropriate for the protection of public health and authorized it for sale in the U.S. The FDA's decision followed an assessment of a PMI's PMTA filed with the agency in March 2020
- Shipment volume of heated tobacco units to the U.S. is included in the heated tobacco unit shipment volume of the Latin America & Canada segment. Revenues from shipments of Platform 1 devices, heated tobacco units and accessories to Altria Group, Inc. for sale under license in the U.S. are included in Net Revenues of the Latin America & Canada segment

2021: EPS Guidance

(\$/share)

	Full-Year		
	2021 Forecast	2020	Organic Growth
Adjusted Diluted EPS ^(a)	\$5.95 - \$6.05	\$5.17	
- Currency	(0.20)		
Adjusted Diluted EPS, excluding currency	\$5.75 - \$5.85	\$5.17	11% - 13%

(a) 2021 Forecast excludes asset impairment and exit costs of \$(0.02). 2020 excludes asset impairment and exit costs of \$(0.08), fair value adjustment for equity security investments of \$(0.04), tax items of \$0.06 and a Brazil indirect tax credit of \$0.05
